Iwona Kucybała is a sixth-year MD student at the Jagiellonian University Medical College in Krakow. As a team member of the Heart Embryology and Anatomy Research Team (HEART) she is involved in numerous research projects in the area of cardiac morphology, morphometry, and imaging. Apart from the interest in the anatomy and physiology of the cardiovascular system, she is the President of the Students' Scientific Group at the Department of Radiology. Her main interests in this area are neuroradiology and interventional radiology.

Katarzyna Ciuk is a third-year MD student at Jagiellonian University Medical College in Krakow and a team member of Heart Embryology and Anatomy Research Team (HEART). The subject of her research covers the clinical anatomy of the right atrium and cardiac conduction system. As well as being interested in the anatomical field, she also is focused on the medical and research areas associated with radiology, forensic medicine, and surgery.

Wiesława Klimek-Piotrowska, MD, PhD is an Associate Professor at the Department of Anatomy of the Jagiellonian University Medical College in Krakow. She is a distinguished lecturer of human anatomy, embryology, anatomical radiology, and surgical anatomy and mentor to many young scientists. In 2013 Doctor Klimek-Piotrowska co-founded the independent research group Heart Embryology and Anatomy Research Team (HEART), whose mission is to explore the clinically relevant morphology of the cardiovascular system. Her special interest in research is proteomic mapping of the human cardiac conduction system.
